DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The primary reasons for allowance for claims 1-9, 11-13, 15-17, 24 and 26-29 are the inclusion of the limitation of a method and a computer program product comprising computer readable storage medium having a computer program stored for constructing a color gamut for a plurality of colorants used in a color image reproduction system.

Claims 1 and 24 are the independent claims and claims 2-9, 11-13, 15-17 & 26-29 are dependent claims to Claim 1 and Claim 24, respectively.

With respect to claim 1, prior art Braun et al (US 7,239,422) teaches establishing a forward model for the color image reproduction system, the forward model characterizing the correspondence between combinations & the plurality of colorants and resulting colors in a color space; Mahy (US 5,872,898) teaches generating a set of inkvectors defining combinations of colorants in colorant space wherein each inkvector comprises two colorants that are allowed to vary freely between their respective minimum and maximum values, the remaining colorants being fixed at one of a maximum or a minimum value; Spaulding et al (US 5,539,540) teaches subset of inkvectors for the lightness level. However, combining Braun et al (US 7,239,422) with Mahy (US 5,872,898) and Spaulding et al (US 5,539,540) do not teach or suggest the following claim limitations: "identifying a subset of inkvectors for the lightness level wherein the lightness range for each inkvector of the subset includes the lightness level; identifying a pair of endpoint coordinates in the color space for each inkvector of the subset of inkvectors for the lightness

level wherein the pair of endpoint coordinates for an inkvector correspond to endpoints of a line formed by the intersection of the inkvector plane mapped to the color space and a lightness plane of the color space corresponding to the lightness level; identifying boundary coordinates from amongst the endpoint coordinates for the subset of the inkvectors; and forming the gamut contour for the lightness level by connecting the boundary coordinates”.

It is these limitations either alone or combined as claimed that were taught, found, or suggested by the cited prior parts.

Claim 24 recites all identical features of claim 1, except claim 24 is a computer program product claim which comprising computer readable storage medium having a computer program stored.

Claims 1 and 24 are allowed because of the above reasons. Claims 2-9, 11-13 and 15-17 are dependent claims to Claim 1, and claims 26-29 are dependent claims to Claim 24. Therefore claims 2-9, 11-13, 15-17 and 26-29 are allowable.

Reference Prior Arts

2. The closest prior arts in the record are Braun et al (Braun) (US 7,239,422), Huang et al (Huang) (US 5,652,831), Castelli et al (Castelli) (US 5,748,221), Ciccarelli et al (Ciccarelli) (US 5,591,552), Mahy (US 5,872,898), and Spaulding et al (Spaulding) (US 5,539,540).

Response to Arguments

3. This action is responsive to the following communication: applicant arguments/remarks filed on January 18, 2008.

Art Unit: 2625

- Applicant's arguments, section "Drawing" filed on January 18, 2008 with respect to new set of drawings submitted on 1/18/2008 has been fully considered and is accepted by the examiner.
- Applicant's arguments, section "Specification" filed on January 18, 2008 with respect to amended title submitted on 1/18/2008 has been fully considered and is accepted by the examiner.
